

TARIFF OF CALL CHARGES

Revolution phones offers one of the most competitive calls tariffs available.

For example, our rate for calls to UK local and national landline numbers is just 1.2p per minute, per-second billing, no call setup charge.

We can achieve these rates by taking advantage of the competition between the tier 1 telecoms carriers – we use Gamma Telecom, Global Crossing, Cable & Wireless, BT and others.

And we continually renegotiate our terms with these carriers to keep our rates competitive.

Revo users also enjoy very competitive call rates for overseas calls – most of Western Europe and USA is charged at 2ppm and many parts of Asia and the Far East charged at 3ppm.

Conference calls are exceptionally cost-effective, especially if there are a significant number of parties in the call. It's also very easy to set up your own conference calls, there is no need to rely on your telecoms provider to initiate conference calls for you.
