

Revolution Phones can offer you a full-featured, professional call recording system for £6.95 per user per month for as many or as few users as you wish. *

How can we do that?

We provide the call recording facility as a hosted service running on the Revolution hosted core system.

The Traditional approach:

Either a very expensive (£10,000 plus) installation at your premises as part of your existing PABX-based phone system, or
A (multi-thousand pound) add-on to your phone system which doesn't integrate particularly well with either your phones or your network.

The revolutionary approach:

By providing call recording as a hosted service from our network core technology, we can pass on the economies-of-scale to end-users. The result – professional call recording (unlimited minutes) for a zero-cost set up and £6.95 per user.
