# Office Moves Made Easy

Moving office can be a time consuming and costly exercise.

With a Revo phone system, at least the telecoms aspect of the move is quick, easy and inexpensive.

## Moving a conventional phone system – task list:

- Arrange for phone lines at the new premises
- Arrange for phone company to move the PABX, or provide new
- Arrange for telecoms provider to supply new numbers or port existing
- Wait for all the above to actually happen (usually doesn't go according to plan!)
- Move the phones

## Moving a Revo phone system – task list:

- Confirm that the Internet connection will be live on the move date (there are no physical phone lines to be moved)
- Move the phones (the existing numbers are still connected to the Revo system)
