# Click-To-Dial Software

The Revo Unity CTI software package runs on your Windows or Mac desktop and integrates with your phone and your contacts.

You can search your contacts by name and dial them without keying in their number. Incoming calls show the caller's name, rather than just their number.

- Click to dial / click to answer
- Instant messaging
- Make conference calls
- Do not disturb
- Send calls to voicemail
- See your colleagues' busy / free status
- Transfer calls
- Manage voicemail
- Call forwarding
- Call Logs
